

Solar Energy Digital Video Conference

February Environmental Committee Meeting

In partnership with Croatia's Solar Cluster and the Environmental Committee of the American Chamber of Commerce, the U.S. Embassy sponsored a digital video conference (DVC) on solar energy on Wednesday, February 3 at 3:00 pm at the American Corner in Zagreb, located at the Public Library "Bogdan Ogrizovic" on Preradoviceva 5. The conference featured senior energy analyst Jennifer DeCesaro. She discussed the latest trends in the implementation of solar power in the United States, with an emphasis on federal, state, local policies. Jennifer DeCesaro is a Senior Energy Analyst with Sentech, Inc. supporting the U.S. Department of Energy Solar Energy Technologies Program leading the state and utility technical outreach efforts for the market transformation team. She provides strategic direction on how to further the development of solar markets in the United States through direct outreach to state government officials and utility company executives.

Prior to joining Sentech, Jennifer was a senior analyst at Exeter Associates, where she worked on renewable energy integration into the electric grid, transmission policy, and other renewable energy policy development and implementation issues. She also served as a Project Director at Clean Energy Group (CEG), where she was responsible for developing and implementing projects for state clean energy funds to create and expand markets for renewable energy technologies. Additionally, Jennifer worked as a policy specialist for the National Conference of State Legislatures (NCSL), where she lead projects supporting the development of renewable energy and air quality/climate change policies. Jennifer earned her B.A. from Colorado College in 1997 and her masters degree in environmental law from Vermont Law School in 2002.
